DADO NON EQUILIBRATO

1 2 3 4 5 6

2 o 3 -> pacerso

- 1) Successor P sevents elementare?
 - 2) $P(X = X) = (N) P^{X} (1-p)^{N-X}$

1 successor in 20 lanci

 $\binom{20}{1}$ 0.29 $(0.71)^{19} = 0,008656386$

3) almeno 5 successi in 20 lanci

funcione R:

sum (dbinom (x = 5:20, size = 20, prob = 0.29))

= 0.7314817
